Independent Auditor's Report

To the Board of Education
West Bloomfield School District

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of West Bloomfield School District (the "School District") as of and for the year ended June 30, 2010, which collectively comprise the School District's basic financial statements as listed in the table of contents. These financial statements are the responsibility of West Bloomfield School District's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of West Bloomfield School District as of June 30, 2010 and the respective changes in financial position and cash flows, where applicable, for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

As more fully discussed in the management's discussion and analysis section and Note 2 of the financial statements, West Bloomfield School District has incurred expenditures in excess of revenues in the General Fund for the year ended June 30, 2010 primarily due to the reduction in revenue received from the State on a per pupil basis. Management represents that the School District anticipates no increase in per pupil funding for the fiscal year ending June 30, 2011 and the School District must implement cost-cutting initiatives that will enable it to bring expenditures in line with expected current revenues and eliminate the General Fund deficit.

To the Board of Education
West Bloomfield School District

The management's discussion and analysis and budgetary comparison schedule, as identified in the table of contents, are not a required part of the basic financial statements but are supplemental information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management, regarding the methods of measurement and presentation of the required supplemental information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise West Bloomfield School District's basic financial statements. The accompanying other supplemental information, as identified in the table of contents, is not a required part of the basic financial statements. The other supplemental information is presented for the purpose of additional analysis. The other supplemental information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

In accordance with *Government Auditing Standards*, we have also issued a report under separate cover dated September 1, 2010 on our consideration of the School District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide opinions on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

West Bloomfield School District

Management's Discussion and Analysis

This section of West Bloomfield School District's (the "School District") annual financial report presents our discussion and analysis of the School District's financial performance during the year ended June 30, 2010. Please read it in conjunction with the School District's financial statements, which immediately follow this section.

Using this Annual Report

This annual report consists of a series of financial statements and notes to those statements. These statements are organized so the reader can understand the School District financially as a whole. The government-wide financial statements provide information about the activities of the whole School District, presenting both an aggregate view of the School District's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short term as well as what remains for future spending. The fund financial statements look at the School District's operations in more detail than the government-wide financial statements by providing information about the School District's most significant funds (the General Fund and the 2010 Capital Projects Fund) with all other funds presented in one column as nonmajor funds. The remaining statement, the statement of fiduciary assets and liabilities, presents financial information about activities for which the School District acts solely as an agent for the benefit of students and parents.

These financial statements contain the following elements:

West Bloomfield School District

Management's Discussion and Analysis (Continued)

Reporting the School District as a Whole - Government-wide Financial Statements

One of the most important questions asked about West Bloomfield School District is, "As a whole, what is the School District's financial condition as a result of the year's activities?" The statement of net assets (deficit) and the statement of activities, which appear first in the School District's financial statements, report information on the School District as a whole and its activities in a way that helps you answer this question. The statements were prepared to include all assets and liabilities, using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or expenses paid. These two statements report the School District's net assets - the difference between assets and liabilities, as reported in the statement of net assets (deficit) - as one way to measure the School District's financial health or financial position. Over time, increases or decreases in the School District's net assets - as reported in the statement of activities - are indicators of whether its financial health is improving or deteriorating. The relationship between revenues and expenses is the School District's operating results. However, the specified goal of the School District is to provide services to our students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors (such as the quality of the education provided, test scores, favorable class size, percentage of students who go on to college, and the safety of the schools) to assess the overall health of West Bloomfield School District.

The statement of net assets (deficit) and the statement of activities report the governmental activities for the School District, which encompass all of the School District's services, including instruction, support services, community services, athletics, and food services. Property taxes, unrestricted state aid (foundation allowance revenue), and state and federal grants finance most of these activities.

Reporting the School District's Most Significant Funds - Fund Financial Statements

West Bloomfield School District's fund financial statements provide detailed information concerning the most significant funds - not the School District as a whole. Some funds are required to be established by state law and by bond covenants. However, the School District establishes many other funds to help it control and manage money for particular purposes (such as the Cafeteria and Athletic and Co-curricular Funds) or to show that it is meeting legal responsibilities for using certain taxes, grants, and other funds (such as bond-funded construction funds used for voter-approved capital projects). The governmental funds of the School District use the following accounting approach:

West Bloomfield School District

Management's Discussion and Analysis (Continued)

Governmental funds - All of the School District's services are reported in governmental funds. Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the School District and the services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the School District's programs. A reconciliation is also provided to help readers understand the differences between the accounting methods used to report results for the governmental activities (reported in the statement of net assets (deficit) and the statement of activities) and governmental funds (fund level statements).

The School District as Trustee - Reporting the School District's Fiduciary Responsibilities

The School District is the trustee, or fiduciary, for its student activity funds. All of the School District's fiduciary activities are reported in a separate statement of fiduciary assets and liabilities. We exclude these activities from the School District's other financial statements because the School District cannot use these assets to finance its operations. The School District is responsible for ensuring that the assets reported in these funds are used for their intended purposes.

The School District as a Whole

Summary of Net Assets

The statement of net assets (deficit) provides the perspective of West Bloomfield School District as a whole. Table I provides a summary of the School District's net assets (deficit) as of June 30, 2010 and 2009:

TABLE I

	Governmental Activities	
	June 30	
	2010	2009
	(in millions)	
Assets		
Current and other assets	\$ 27.9	\$ 14.3
Capital assets	117.2	121.0
Total assets	145.1	135.3
Liabilities		
Current liabilities	17.5	20.5
Long-term liabilities	111.0	99.4
Total liabilities	128.5	119.9

West Bloomfield School District

Management's Discussion and Analysis (Continued)

TABLE I (Continued)

	Governmental Activities	
	June 30	
	2010	2009
	(in millions)	
Net Assets (Deficit)		
Invested in capital assets - Net of related debt	\$ 9.3	\$ 19.4
Restricted	15.9	1.5
Unrestricted	(8.6)	(5.5)
Total net assets	<u>\$ 16.6</u>	<u>\$ 15.4</u>

West Bloomfield School District's net assets were \$16.6 million at June 30, 2010. Capital assets, net of related debt totaling \$9.3 million, compares the original cost, less depreciation of the School District's capital assets, to long-term debt used to finance the acquisition of those assets. These debts will be repaid from voter-approved property taxes collected as the debt service comes due. Restricted net assets are reported separately to show legal constraints from debt covenants and enabling legislation that limit the School District's ability to use those net assets for day-to-day operations. The remaining amount of net assets totaling (\$8.6) million was unrestricted.

The (\$8.6) million in unrestricted net assets of governmental activities represent the accumulated results of all past years' operations. The unrestricted net assets deficit represents the School District's decline in cash flow to meet working capital and operating needs. The operating results of the General Fund will have a significant impact on the change in unrestricted net assets from year to year.

Summary of Activities

The results of this year's operations for West Bloomfield School District as a whole are reported in the statement of activities (Table 2), which shows the changes in net assets for fiscal years ended June 30, 2010 and 2009.

TABLE 2

	Governmental Activities	
	2010	2009

Management's Discussion and Analysis (Continued)

TABLE 2 (Continued)

	Governmental Activities	
	2010	2009
	(in millions)	
Functions/Program Expenses		
Instruction	\$ 50.4	\$ 52.6
Support services	28.2	30.3
Athletics	1.2	1.2
Food services	2.2	2.0
Community services	2.4	2.6
Intergovernmental expenditure	0.1	-
Interest on long-term debt	4.9	4.4
Total functions/program expenses	89.4	93.1
Increase (Decrease) in Net Assets	1.2	(2.0)
Net Assets - Beginning of year	15.4	17.4
Net Assets - End of year	<u>\$ 16.6</u>	<u>\$ 15.4</u>

As reported in the statement of activities, the cost of all of our governmental activities this year was \$89.4 million. Certain activities were partially funded from those who benefited from the programs (\$4.3 million) or by other governments and organizations that subsidized certain programs with grants and contributions (\$13.9 million). We paid for the remaining "public benefit" portion of our governmental activities with \$26.0 million in taxes, \$43.8 million in State foundation allowance, \$1.9 in federal unrestricted sources, and \$0.7 million with our other revenues, such as interest and general entitlements.

The School District experienced an increase in net assets of \$1.2 million.

As discussed above, the net cost shows the financial burden that was placed on the State and the School District's taxpayers by each of these functions. Since property taxes for operations and unrestricted state aid constitute the vast majority of the School District's operating revenue sources, the Board of Education and administration must annually evaluate the needs of the School District's needs and balance those needs with State-prescribed resources.

The School District's Funds

As we noted earlier, West Bloomfield School District uses funds to help it control and manage money for particular purposes. This fund-by-fund breakdown of revenue and expenditures (and related assets and liabilities) helps the reader consider whether the School District is being accountable for the resources taxpayers and others provide and may provide more insight into the School District's overall financial health.

West Bloomfield School District

Management's Discussion and Analysis (Continued)

As the School District completed this year, the governmental funds reported a combined fund balance of \$14.7 million, which is an increase of \$11.0 million from last year. Significant changes by fund are as follows:

In the General Fund, our principal operating fund, the fund balance decreased approximately \$3.4 million to a deficit of (\$1.7) million. The change is mainly due to the fact that budget reductions and cost-cutting measures implemented by the Board of Education and administration for the 2009-2010 school year were not adequate with respect to the level of resources received and required to maintain instructional services to the School District's students and expectations of the community. Of particular concern is the continued lack of funding increases of the state foundation allowance compared to increases in healthcare and mandatory retirement costs. Beginning October 2010, school aid to the School District was reduced by \$2.9 million and included the total elimination of Section 20j of the school aid bill, which represented \$1.8 million of revenue and a reduction of \$1.1 million under Section 11d of the school aid bill. These reductions came four months into the School District's fiscal year after which staffing commitments were complete along with class offerings to students. Had these funding reductions not taken place, the School District would have ended fiscal year June 30, 2010 in a surplus rather than deficit condition. To this end, the board used the School District's fund balance to offset the disparity between revenues and expenditures. The board also offered a voluntary severance program. In connection with this program, 12 instructional staff members and 38 staff members chose to retire at June 30, 2010, creating cost savings for the School District. The School District also filed with the Michigan Department of Education (MDE), a preliminary deficit elimination plan (DEP). The DEP calls for budget reductions during fiscal year 2010-2011 totaling \$8.5 million in budget adjustments. The DEP will be revised in late fall 2010, once the actual deficit fund balance is confirmed by submission of this audit report to MDE. The revised DEP will be submitted on or before December 15, 2010. It is the hope of the School District to show a declining deficit in future years, ultimately reaching a positive fund balance, as prescribed by law.

In the Special Revenue Funds, the fund balance increased approximately \$0.1 million to \$0.5 million. The change is mainly due to the excess of revenue over expenditures in the Cafeteria Fund of \$0.1 million. The Cafeteria Fund increase was due to increased participation, additional serving days, and increases in lunch prices and reimbursements under the federal free and reduced price lunch program.

In the Debt Service Funds, the fund balance decreased approximately \$0.3 million to \$1.1 million. The decrease was due primarily to the draw-down of fund balance in order to maintain the School District's debt retirement millage rate at 6.20 mills; further, the decline in interest rates resulted in reductions in investment income.

West Bloomfield School District

Management's Discussion and Analysis (Continued)

The 2004 Capital Projects Fund was closed out at June 30, 2010. The remaining fund balance of \$87,000 at June 30, 2009 was used during the 2009-2010 school year for technology and facility needs. In the 2010 Capital Projects Fund, the School District issued through the MMBA (Michigan Municipal Bond Authority), \$15 million in federal ARRA (American Recovery and Reinvestment Act) Qualified School Construction Bonds. The majority of the interest to be paid on these bonds is reimbursable from the federal government. The Board of Education ratified the sale of the bonds at their meeting held on May 24, 2010. The bonds can only be used for school construction, site improvements, and remodeling projects. The remaining bond proceeds of \$14,776,692 are in the 2010 Capital Projects Fund as of June 30, 2010.

General Fund Budgetary Highlights

Over the course of the year, West Bloomfield School District revises its budget as it attempts to deal with unexpected changes in revenues and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. The budget was amended in February 2010 and final amendments to the budget were adopted on June 21, 2010. Amendments reflected changes due to enrollment, state and federal grants, changes in staffing levels, and the impact of the federal ARRA stabilization funds. A schedule showing the School District's original and final budget amounts compared with amounts actually paid and received is provided in required supplemental information of these financial statements. There were no significant variances between the final budget and actual amounts. In fact, actual spending reflected a decrease from the final budget of \$1,498,627.

There were revisions made to the 2009-2010 General Fund original budget. Budgeted revenues were decreased net by \$712,984 due to reductions in local revenue and the loss of state sources which were, for the most part, offset by increases in federal ARRA stabilization funds. There was also a carryover at year end of \$515,901 in federal funds.

Final budgeted expenditures were also increased by \$2,724,787 to reflect changes in staffing, compensation, health insurance, and mandatory retirement payments and the impact of the federal ARRA funding.

The final amended budget and actual amounts at June 30, 2010 depict a net decrease in revenue of \$258,687 and a decrease in expenditures of \$1,498,627, between final budgets and actual results. The overall reduction in expenditures was brought about by a district-wide cost containment at mid-year in all areas of School District operations. The School District also received over \$3.3 million in federal ARRA stabilization and IDEA funds to offset losses in state school aid and to provide additional resources through the federal IDEA program for special needs students.

The amount of transfers to other funds established in the amended budget was \$963,059 and represents support provided by the General Fund to other functions such as high school and middle school athletic programs and high school co-curricular activities.

West Bloomfield School District

Management's Discussion and Analysis (Continued)

Capital Assets and Debt Administration

Capital Assets

As of June 30, 2010, the School District had \$174.4 million invested in a broad range of capital assets, including land, buildings, building improvements, vehicles, furniture, and equipment. This amount represents a net decrease (including additions, disposals, and depreciation) of approximately \$3.8 million from last year.

	2010	2009
Land	\$ 8,147,575	\$ 8,147,575
Construction in progress	14,192	-
Buildings and building improvements	140,818,929	140,811,695
Buses and other vehicles	4,598,584	4,884,149
Furniture and equipment	20,789,074	20,564,346
Total capital assets	174,368,354	174,407,765
Less accumulated depreciation	57,152,782	53,427,916
Net capital assets	<u>\$ 117,215,572</u>	<u>\$ 120,979,849</u>

The 2004 Capital Projects Fund has been closed out. However, the School District also received approval for an allocation of \$15 million in funding from the ARRA Qualified School Construction Bond Program. These bonds were sold in May 2010 and will provide a three-year source of capital funding for district-wide facility and site needs. These funds are required to be spent within 36 months of issuance. We present more detailed information about our capital assets in the notes to the financial statements.

Debt

At the end of this year, the School District had \$107.6 million in bonds outstanding versus \$101.2 million in the previous year. Those bonds consisted of the following:

	2010	2009
General obligation bonds	\$ 107,590,000	\$ 101,155,000

The School District's general obligation bond rating is Baa1 with Moody's Investors Service. The State limits the amount of general obligation debt that schools can issue to 15 percent of the assessed value of all taxable property within the School District's boundaries. If the School District issues "qualified debt," i.e., debt backed by the State of Michigan, such obligations are not subject to this debt limit. The School District's outstanding unqualified general obligation debt of \$107.6 million is significantly below this \$308.6 million statutorily imposed limit.

West Bloomfield School District

Management's Discussion and Analysis (Continued)

Other obligations include accrued sick leave and voluntary severance incentive packages. We present more detailed information about our long-term liabilities in the notes to the financial statements.

Economic Factors and Next Year's Budgets and Rates

The Board of Education and administration consider many factors when setting the School District's fiscal year budget. One of the most important factors affecting the budget is our student count and the state foundation allowance. Ninety percent of the School District's revenue is determined by multiplying the student count by the state foundation allowance. The student count is a blend using 25 percent from the February 2010 count and 75 percent from the September 2010 count. The 2010-2011 budget was adopted on June 21, 2010 and was based on a projected enrollment of 6,861 students for September 2010.

The School District's revenue is then determined by multiplying the blended enrollment and the state-approved foundation allowance. Under current state law, the School District cannot assess additional property tax revenue to fund general operations of the School District. West Bloomfield School District, like all other school districts in Michigan, is heavily dependent on the State to fund school operations. Once the state foundation allowance is determined and the student count is finalized, state law requires the School District to amend the budget if projected revenue is not adequate to fund original appropriations.

Since the School District's revenue is heavily dependent on the State for funding and the health of the State's School Aid Fund, the actual revenue received depends on the State's ability to collect revenues to fund its appropriation to school districts. The School Aid Bill for the 2010-2011 school year was finalized after the adoption of the budget on June 21, 2010. The School District anticipated a decrease in state funding of \$268 per pupil. However, the adopted school aid bill did not contain the \$268 decrease and, in fact, added \$11 per pupil. This has the impact of a positive change in school aid of \$279/pupil and overall, \$1.9 million in operating revenue. The concern exists, however, as to whether or not there will be mid-year prorations in school aid after the results of the January 2011 revenue consensus conference are known. The School District will amend its budget to reflect any change from the amounts originally budgeted once the September enrollment is known and all hiring commitments are complete.

Given the current economic climate, the School District is doing everything possible to maintain programs for students and to continually look for economies in all facets of school operations so that the School District remains competitive. To this end, many of the School District's employees have agreed to contract concessions including changes in wages and benefits for the 2010-2011 school year. The School District also solicits input from parents, community members, and staff regarding the School District's financial situation and constructive ideas for changes to programs and the budget.

Governmental Funds Reconciliation of the Statement of Revenue, Expenditures, and Changes in Fund Balances (Deficit) of Governmental Funds to the Statement of Activities Year Ended June 30, 2010

Net Change in Fund Balances - Total Governmental Funds \$ 11,040,029

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures; however, in the statement of activities, these costs are allocated over their estimated useful lives as depreciation:

Depreciation expense	\$ (3,981,876)	
Capitalized capital outlay	<u>246,154</u>	(3,735,722)

Governmental funds report proceeds from sale of assets as revenue; in the statement of activities, these are recorded net of carrying value of the disposed assets (28,555)

Bond proceeds provide financial resources to governmental funds, but issuing bonds increases long-term liabilities in the statement of activities (15,000,000)

Deferred bond charges and bond premium reported as expenditures and revenue, respectively, in the funds are amortized in the statement of activities 118,339

Repayment of bond principal is an expenditure in the governmental funds, but not in the statement of activities (where it reduces long-term debt) 8,565,000

Accrued interest is recorded in the statement of activities when incurred; it is not reported in governmental funds until paid (71,015)

Compensated absences and voluntary severance incentives are recorded when earned in the statement of activities. In the current year, more was paid out than earned 330,681

Change in Net Assets of Governmental Activities \$ 1,218,757

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note I - Summary of Significant Accounting Policies

The accounting policies of West Bloomfield School District (the "School District") conform to accounting principles generally accepted in the United States of America (GAAP) as applicable to governmental units. The following is a summary of the significant accounting policies used by the School District:

Reporting Entity

The School District is governed by an elected seven-member Board of Education. The accompanying financial statements have been prepared in accordance with criteria established by the Governmental Accounting Standards Board for determining the various governmental organizations to be included in the reporting entity. These criteria include significant operational financial relationships that determine which of the governmental organizations are a part of the School District's reporting entity, and which organizations are legally separate component units of the School District. Based on the application of the criteria, the School District does not contain any component units.

Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets (deficit) and the statement of activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. All of the School District's government-wide activities are considered governmental activities.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenue includes (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes, intergovernmental payments, and other items not properly included among program revenues are reported instead as general revenue.

Separate financial statements are provided for governmental funds and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note I - Summary of Significant Accounting Policies (Continued)

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Government-wide Financial Statements - The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenue in the year for which they are levied. Grants, categorical aid, and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements.

Amounts reported as program revenue include (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions. Internally dedicated resources are reported as general revenue rather than as program revenue. Likewise, general revenue includes all taxes, unrestricted state aid, and federal stabilization funds.

Fund Financial Statements - Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenue is recognized as soon as it is both measurable and available. Revenue is considered to be available if it is collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the School District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, unrestricted state aid, intergovernmental grants, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenue of the current fiscal period. All other revenue items are considered to be available only when cash is received by the School District.

The fiduciary fund statement is also reported using the economic resources measurement focus and the accrual basis of accounting. The fiduciary fund is used to account for assets held by the School District in a trustee capacity or as an agent. The Agency Fund is custodial in nature (assets equal liabilities) and does not involve the measurement of results of operations. The School District presently maintains a Student Activities (Agency) Fund for the high school and middle schools to record the transactions of student groups for school and school-related purposes. The funds are segregated and held in trust for the students.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note I - Summary of Significant Accounting Policies (Continued)

The School District reports the following major governmental funds:

General Fund - The General Fund is the School District's primary operating fund. It accounts for all financial resources of the School District, except those required to be accounted for in another fund.

2010 Capital Projects Fund - The 2010 Capital Projects Fund is used to record bond proceeds or other revenue and the disbursement of invoices specifically designated for building renovations and site improvements, as well as repayment of the outstanding balance of an installment purchase obligation. The fund operates until the purpose for which it was created is accomplished.

Additionally, the School District reports the following fund types:

Special Revenue Funds - Special Revenue Funds are used to account for the proceeds of specific revenue sources that are restricted to expenditure for specified purposes. The School District's Special Revenue Funds include the Cafeteria, Athletic and Co-curricular, Special Education Center Program, and Community Education Funds. Any operating deficit generated by these activities is the responsibility of the General Fund.

2004 Capital Projects Fund - The 2004 Capital Projects Fund is used to record bond proceeds or other revenue and the disbursement of invoices specifically designated for remodeling, equipping, re-equipping, furnishing, and refurnishing school buildings, other facilities, athletic fields, and playgrounds, as well as repayment of the outstanding balance of an installment purchase obligation. The fund operates until the purpose for which it was created is accomplished.

Debt Service Funds - Debt Service Funds are used to record tax, interest, and other revenue for payment of interest, principal, and other expenditures on long-term debt.

Student Activities Agency Fund - The School District presently maintains an Agency Fund to record the transactions of student groups for school and school-related purposes. The funds are segregated and held in trust for the students.

Assets, Liabilities, and Net Assets or Equity

Cash and Investments - Cash and investments include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. Investments are stated at fair value. Investment income is recorded in the fund for which the investment account was established.

Receivables and Payables - In general, outstanding balances between funds are reported as "due to/from other funds."

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note I - Summary of Significant Accounting Policies (Continued)

The School District considers all receivables to be fully collectible; accordingly, no allowance for uncollectible amounts is recorded. Property taxes are assessed as of December 31 and the related property taxes become a lien on July 1 of the following year for the taxes that are due on September 15. At this time, penalties and interest are assessed and the total obligation is added to the county tax rolls.

Inventories and Prepaid Costs - Inventories are valued at cost, on a first-in, first-out basis. Inventories of governmental funds are recorded as expenditures when purchased. Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in both government-wide and fund financial statements.

Restricted Assets - Regulations require that the unspent bond proceeds from the 2010 Capital Projects Bond issue be set aside for construction, and the Debt Service Funds cash is required to be used for future bond payments. As such, these amounts have been classified as restricted assets.

Capital Assets - Capital assets, which include land, buildings, building improvements, furniture, equipment, buses, and other vehicles, are reported in the applicable governmental-wide financial statements. Capital assets are defined by the School District as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. Costs of normal repair and maintenance that do not add to the value or materially extend asset life are not capitalized. The School District does not have infrastructure-type assets.

Buildings, building improvements, furniture, equipment, buses, and other vehicles are depreciated using the straight-line method over the following useful lives:

Buildings and building improvements	20 years to 50 years
Buses and other vehicles	5 years to 10 years
Furniture and other equipment	5 years to 10 years

Deferred Revenue - Governmental funds report deferred revenue in connection with resources that have been received but not yet earned. At the end of the current fiscal year, the School District had unearned grant payments, unearned property tax payments, and summer school tuition received of \$777,096 recorded as deferred revenue.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note I - Summary of Significant Accounting Policies (Continued)

Compensated Absences - The liability for compensated absences reported in the government-wide statements consists of earned but unused accumulated vacation and sick leave benefits and a voluntary severance incentive. A liability for these amounts is reported in governmental funds as it comes due for payment. The liability has been calculated using the vesting method, in which leave amounts for both employees who are currently eligible to receive termination payments at normal retirement age and other employees who are expected to become eligible in the future to receive such payments upon normal retirement are included.

A liability for early termination benefits is reported in the government-wide statements at the discounted present value of the expected future benefit payments using a discount rate of 3 percent. The early termination benefits consist of early retirement incentive cash payments provided to 92 employees over a five- to seven-year period. The cost of the obligation is reported in long-term debt. These amounts are the responsibility of the General Fund.

Long-term Obligations - In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net assets (deficit). Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period.

The face amount of debt is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts are reported as other financing uses. Issuance costs are reported as debt service expenditures.

Fund Equity - In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 1 - Summary of Significant Accounting Policies (Continued)

Upcoming Accounting Pronouncement - In March 2009, the GASB issued Statement No. 54, *Fund Balance Reporting and Governmental Fund-type Definitions*. The objective of this statement is to enhance the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying the existing governmental fund-type definitions. This statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. Under this standard, the fund balance classifications of reserved, designated, and unreserved will be replaced with five new classifications: nonspendable, restricted, committed, assigned, and unassigned. The School District is currently evaluating the impact this standard will have on the financial statements when adopted. The School District will implement GASB Statement No. 54 beginning with the fiscal year ending June 30, 2011.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 1, 2010, which is the date the financial statements were available to be issued.

Note 2 - Stewardship, Compliance, and Accountability

Budgetary Information - Annual budgets are adopted on a basis consistent with generally accepted accounting principles and state law for the General Fund and all Special Revenue Funds. All annual appropriations lapse at fiscal year end.

The budget document presents information by fund, function, and object. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. State law requires the School District to have its budget in place by July 1. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits districts to amend their budgets during the year. The School District increased budget amounts during the year in response to the impact of the federal ARRA funds.

Encumbrance accounting is employed in governmental funds. Amounts encumbered for purchase orders, contracts, etc. are not tracked during the year. Budget appropriations are considered to be spent once the goods are delivered or the services rendered.

Excess of Expenditures Over Appropriations in Budgeted Funds - The School District did not have significant expenditure budget variances.

Fund Deficit - The School District has accumulated a fund balance deficit in the General Fund approximating \$1,722,000. The deficit is a violation of State law. A deficit elimination plan, as required, has been filed with the State of Michigan and the School District has notified the State as required by law.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 2 - Stewardship, Compliance, and Accountability (Continued)

Capital Projects Fund Compliance - The 2004 Capital Projects Fund and the 2010 Capital Projects Fund include capital project activities funded with bonds issued after May 1, 1994. For these capital projects, the School District has complied with the applicable provisions of §1351a of the State of Michigan's School Code.

Note 3 - Deposits and Investments

State statutes and the School District's investment policy authorize the School District to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The School District is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, commercial paper rated prime at the time of purchase that matures not more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The School District's deposits are in accordance with statutory authority.

The School District has designated two banks for the deposit of its funds.

The School District's cash and investments are subject to several types of risk, which are examined in more detail below:

Custodial Credit Risk of Bank Deposits - Custodial credit risk is the risk that in the event of a bank failure, the School District's deposits may not be returned to it. The School District's investment policy requires that financial institutions be evaluated and only those with an acceptable risk level be used for the School District's deposits for custodial credit risk. At year end, the School District's deposit balance of \$18,867,590 had \$18,367,590 of bank deposits (certificates of deposit, checking, and savings accounts) that were uninsured and uncollateralized. The School District believes that due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. As a result, the School District evaluates each financial institution with which it deposits funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

Custodial Credit Risk of Investments - Custodial credit risk is the risk that, in the event of the failure of the counterparty, the School District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The School District's policy for custodial credit risk states that custodial credit risk will be minimized by limiting investments to the types of securities allowed by state law, and by pre-qualifying the financial institutions, broker/dealers, intermediaries, and advisors with which the School District will do business using the criteria established in the investment policy. There were no investment securities that were uninsured and unregistered and held at June 30, 2010.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 3 - Deposits and Investments (Continued)

Interest Rate Risk - Interest rate risk is the risk that the value of investments will decrease as a result of a rise in interest rates. The School District's investment policy does not restrict investment maturities, other than commercial paper which can only be purchased with a 270-day maturity. The School District's policy minimizes interest rate risk by structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities in the open market; and investing operating funds primarily in shorter-term securities, liquid asset funds, money market mutual funds, or similar investment pools and limiting the average maturity in accordance with the School District's cash requirements.

Credit Risk - State law limits investments in commercial paper to the top two ratings issued by nationally recognized statistical rating organizations. The School District's investment policy does not further limit its investment choices.

At year end, the maturities of investments and the credit quality ratings of debt securities (other than the U.S. government) are as follows:

<u>Investment</u>	<u>Fair Value</u>	<u>Maturities</u>	<u>Rating</u>	<u>Rating Organization</u>
Bank investment pool	<u>\$ 1,146,331</u>	Immediate	A-1	S&P

Concentration of Credit Risk - The School District places no limit on the amount the School District may invest in any one issuer. The School District's policy minimizes concentration of credit risk by requiring diversification of the investment portfolio so that the impact of potential losses from any one type of security or issuer will be minimized. All of the School District's investments are in bank investment pools.

Foreign Currency Risk - Foreign currency risk is the risk that an investment denominated in the currency of a foreign country could reduce its U.S. dollar value as a result of changes in foreign currency exchange rates. State law and the School District's policy prohibit investment in foreign currency.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 4 - Capital Assets

Capital asset activity of the School District's governmental activities was as follows:

Governmental Activities	Balance July 1, 2009	Additions/ Transfers	Disposals	Balance June 30, 2010
Capital assets not being depreciated:				
Land	\$ 8,147,575	\$ -	\$ -	\$ 8,147,575
Construction in progress	-	14,192	-	14,192
Subtotal	8,147,575	14,192	-	8,161,767
Capital assets being depreciated:				
Buildings and building improvements	140,811,695	7,234	-	140,818,929
Furniture and equipment	20,564,346	224,728	-	20,789,074
Buses and other vehicles	4,884,149	-	285,565	4,598,584
Subtotal	166,260,190	231,962	285,565	166,206,587
Accumulated depreciation:				
Buildings and building improvements	35,014,470	2,469,824	-	37,484,294
Furniture and equipment	14,820,019	1,205,669	-	16,025,688
Buses and other vehicles	3,593,427	306,383	257,010	3,642,800
Subtotal	53,427,916	3,981,876	257,010	57,152,782
Net capital assets being depreciated	112,832,274	(3,749,914)	28,555	109,053,805
Net capital assets	\$ 120,979,849	\$ (3,735,722)	\$ 28,555	\$ 117,215,572

Depreciation expense was charged to activities of the School District as follows:

Governmental activities:	
Instruction	\$ 3,194,261
Support services	668,159
Community services	6,768
Food services	79,638
Athletics	33,050
Total governmental activities	\$ 3,981,876

	Spent to Date	Remaining Commitment
2010 Bond Issue	\$ 16,751	\$ 1,255,400

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 5 - Interfund Receivables, Payables, and Transfers

The composition of interfund balances is as follows:

Fund Due To	Fund Due From		Total
	General Fund	Student Activities Fund	
Nonmajor governmental funds	\$ 314,671	\$ 198	\$ 314,869

Interfund balances represent cash and investments that are held in the General Fund on behalf of other funds.

Transfer In	Transfers Out		Total
	General Fund	Nonmajor Governmental Funds	
General Fund	\$ -	\$ 251,253	\$ 251,253
Nonmajor governmental funds	957,471	-	957,471
Total	\$ 957,471	\$ 251,253	\$ 1,208,724

Interfund transfers represent transfers from the General Fund to the Special Revenue Funds for operational support as well as transfers from Special Revenue Funds to the General Fund to cover indirect costs.

Note 6 - Long-term Debt

The School District issues bonds, notes, and other contractual commitments to provide for the acquisition and construction of major capital facilities and the acquisition of certain equipment. General obligation bonds are direct obligations and pledge the full faith and credit of the School District. Notes and installment purchase agreements are also general obligations of the School District. Other long-term obligations include compensated absences, termination benefits, and certain risk liabilities.

The School District has a \$15,000,000 bank flex line of credit note to be used for operating cash flow. The line of credit note bears interest, which is due monthly, at a LIBOR-based rate, which had an effective rate of 1.26 percent at June 30, 2010. The School District borrowed on the line of credit note during the fiscal year and the outstanding balance on the line of credit note as of June 30, 2010 was \$7,000,000. The flex line matures on July 2, 2011.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 6 - Long-term Debt (Continued)

Long-term debt activity can be summarized as follows:

	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year
Governmental Activities					
Bonds	\$ 101,155,000	\$ 15,000,000	\$ 8,565,000	\$ 107,590,000	\$ 8,950,000
Less deferred amounts:					
Bond premium	2,726,780	-	391,127	2,335,653	391,227

Governmental Activities

General obligation bonds consist of the following:

\$24,000,000 serial and term bonds due in annual installments of \$800,000 through May 1, 2011; interest at 4.55%	\$ 800,000
\$20,745,000 serial and term bonds due in annual installments of \$955,000 to \$2,725,000 through May 1, 2020; interest at 4.00%-5.50%	20,150,000
\$46,120,000 serial and term bonds due in annual installments of \$5,110,000 to \$6,410,000 through May 1, 2014; interest at 3.0%-5.0%	23,020,000

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 6 - Long-term Debt (Continued)

\$22,435,000 serial and term bonds due in annual installments of \$910,000 to \$1,475,000 through May 1, 2018; interest at 3.50%-5.25%	\$ 9,680,000
\$17,015,000 serial and term bonds due in annual installments of \$35,000 to \$2,015,000 through May 1, 2021; interest at 3.20%-5.00%	16,735,000
\$9,530,000 serial and term bonds due in annual installments of \$1,500,000 to \$1,555,000 from May 1, 2019 through May 1, 2024; interest at 4.00%	9,160,000
\$14,135,000 serial and term bonds due in annual installments of \$875,000 to \$3,055,000 through May 1, 2017; interest at 3.00%-5.00%	13,045,000
\$15,000,000 serial and term bonds due in annual installments of \$1,000,000 to \$1,250,000 from May 1, 2015 through May 1, 2027; interest at 4.125%-6.70%	<u>15,000,000</u>
Total bonded debt	<u>\$ 107,590,000</u>

Other governmental activities long-term obligations include the following:

Employee compensated absences	\$ 2,317,806
Voluntary severance incentive	<u>4,385,600</u>
Total	<u>\$ 6,703,406</u>

Advance and Current Refundings - In prior years, the School District defeased certain bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust accounts assets and liabilities for the defeased bonds are not included in the basic financial statements. At June 30, 2010, \$96,280,000 of bonds outstanding are considered defeased.

Note 7 - Restricted Assets

The balances for the restricted asset accounts are as follows:

	<u>Governmental Activities</u>
Unspent bond proceeds and related interest	\$ 14,825,503
Debt Service Funds cash and investments	<u>1,139,917</u>
Total restricted assets	<u>\$ 15,965,420</u>

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 8 - Risk Management

The School District is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation), as well as medical benefits provided to employees. The School District participates in the MAISL risk pool for claims relating to property loss, torts, and errors and omissions. The School District has purchased commercial insurance for medical claims and participates in the SET-SEG risk pool for claims relating to workers' compensation. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

The shared-risk pool program in which the School District participates operates as a common risk-sharing management program for school districts in Michigan; member premiums are used to purchase commercial excess insurance coverage and to pay member claims in excess of deductible amounts.

The SET-SEG risk pool operates as a claims servicing pool for amounts up to member retention limits and operates as a common risk-sharing management program for losses in excess of member retention amounts. Although premiums are paid annually to the service pool that the service pool uses to pay claims up to the retention limits, the ultimate liability for those claims remains with the School District.

Note 9 - Defined Benefit Pension Plan and Postemployment Benefits

Plan Description - The School District participates in the Michigan Public School Employees' Retirement System (MPERS), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the School District. The system provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The system also provides postemployment healthcare benefits to retirees and beneficiaries who elect to receive those benefits.

The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplemental information for the pension and postemployment healthcare plans. That report is available on the web at <http://www.michigan.gov/orsschools>, or by writing to the Office of Retirement System at 7150 Harris Drive, P.O. Box 30171, Lansing, MI 48909.

West Bloomfield School District

Notes to Financial Statements June 30, 2010

Note 9 - Defined Benefit Pension Plan and Postemployment Benefits (Continued)

Pension Benefits - Employer contributions to the pension system result from the implementing effects of the School Finance Reform Act. Under these procedures, each school district is required to contribute the full actuarial funding contribution amount to fund pension benefits. The employer contribution rate was 9.73 percent of covered payroll for the period from July 1, 2009 through September 30, 2009 and 10.13 percent for the period from October 1, 2009 through June 30, 2010. Basic plan members make no contributions, but member investment plan members contribute at rates ranging from 3 percent to 4.3 percent of gross wages. The School District's required and actual contributions to the plan for the years ended June 30, 2010, 2009, and 2008 were approximately \$6,995,000, \$7,073,000, and \$7,149,000, respectively.

Postemployment Benefits - Under the MPSERS Act, all retirees participating in the MPSERS pension plan have the option of continuing health, dental, and vision coverage through MPSERS. Retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits on a pay-as-you-go basis. Participating employers are required to contribute at that rate. The employer contribution rate was 6.81 percent of covered payroll for the period from July 1, 2009 through September 30, 2009 and 6.81 percent for the period from October 1, 2009 through June 30, 2010. The School District's required and actual contributions to the plan for retiree healthcare benefits for the years ended June 30, 2010, 2009, and 2008 were approximately \$747,000, \$704,000, and \$763,000, respectively.
