Welcome 2018-2019 Interns

The Project SEARCH interns this year are from Bloomfield, Farmington, Oak Park, Walled Lake and West Bloomfield School Districts.

Getting into the habit...

This year the interns began developing team building skills in the first hour. They learned how to be proactive in their actions and in their words by taking responsibility for their choices and their responses.

Congratulations! You’re first rotation will be...

On Thursday, September 27, the interns learned of their first assignments from hospital liaisons Linda Smith and Christina Campbell. This moment created excitement for all. The interns bring their smiles and commitment as they make a positive difference and contribute to the Henry Ford Hospital community. The interns will be working in the following departments: Environmental Services-Linens, Surgery Recycling, Endoscopy, Physical Therapy, Pharmacy, Chestnut floors 1 & 3, Chestnut floors 2 & 4, Patient Transportation. Thank you to the department managers and their staff for welcoming the interns to your departments.

First work...then play...

Requesting a job application can be an intimidating experience. This is the first step in seeking out any type of employment. The interns experienced this first hand at Great Lakes Mall. Initially, they thought it might be easy, but to their surprise it was difficult at first. After securing a few applications, and having lunch, we took a few fun pictures.
